

SHIVAM PRADHAN

Azure DevOps Engineer | Kubernetes | Terraform | CI/CD | Cloud Infrastructure

+91 9472052351 • spbxr5168@gmail.com • LinkedIn • Immediate Joiner

PROFESSIONAL SUMMARY

Azure DevOps Engineer with 3+ years of hands-on experience designing, automating, and managing scalable cloud infrastructure and CI/CD platforms on Microsoft Azure. Specialized in Azure DevOps, Terraform, Docker, Kubernetes (AKS), Jenkins, and multi-environment cloud deployments across Dev, QA, UAT, Demo, and Production environments. Strong expertise in Infrastructure as Code (IaC), deployment automation, monitoring, networking, and cloud security. Proven ability to streamline software delivery pipelines, troubleshoot production issues, perform Root Cause Analysis (RCA), and support secure zero-downtime deployments in Agile environments. Experienced in collaborating with development, QA, and operations teams to ensure reliable application delivery, incident resolution, and infrastructure stability.

TECHNICAL SKILLS

Microsoft Azure Cloud: App Service, AKS, Container Apps, Function App, Key Vault, Monitor, RBAC, Managed Identity, ACR, Event Hubs, API Management, Azure Active Directory, Service Bus.

DevOps & CI/CD: Azure DevOps, GitHub Actions, Jenkins, CI/CD Pipelines Automation, Build Automation, Release Management.

Infrastructure as Code(IaC): Terraform, Terraform Modules, Remote Backend, State Locking.

Containers & Orchestration: Docker, Kubernetes (AKS), Helm, HPA, Ingress, Blue-Green & Canary Deployments.

Monitoring & Reliability: Azure Monitor, Log Analytics, Application Insights, Observability Dashboards, Alerting, Incident Management, Platform Troubleshooting, High Availability, Azure Network Watcher.

Scripting: Python, PowerShell.

Operating Systems(OS): Windows Server, Linux.

Networking & Security: Azure Vnet, Managed Identity, IAM, NSG, ASG, Conditional Access, PIM, Secrets Management, Secure CI/CD Practices, Private Endpoints.

Methodologies: Agile/Scrum, DevOps Lifecycle, Root Cause Analysis (RCA).

Tools: Jira, Azure Boards, Git.

WORK EXPERIENCE

Associate Consultant — DevOps Engineer | Seasia Infotech, Chandigarh

Apr 2023 – Feb 2026

- Architected and managed Azure cloud infrastructure across 4 environments, focusing on automation, security, and performance optimization.
- Reduced manual provisioning effort by 70% using reusable Terraform modules and automated deployment templates.
- Built and managed end-to-end CI/CD pipelines, reducing deployment cycle time from 2 days to under 4 hours.
- Implemented secure CI/CD practices using RBAC, Managed Identity, Azure Key Vault, and centralized secrets management.
- Automated operational tasks using PowerShell and Python scripts, improving deployment consistency and reducing support effort.
- Implemented Blue-Green and Canary deployment strategies with automated health checks to achieve near-zero downtime releases.
- Configured Azure Monitor, Log Analytics, and Application Insights dashboards, reducing incident detection time from 45 minutes to under 10 minutes.
- Provided incident support, troubleshooting, and Root Cause Analysis (RCA) for deployment and

infrastructure issues.

- Supported Linux and Windows-based cloud workloads, including deployment troubleshooting, access management, and platform maintenance.
- Collaborated with cross-functional Agile teams to ensure reliable and timely application releases.

Software Developer Intern | Seasia Infotech, Chandigarh

Jan 2023 – Mar 2023

- Built an Employee Management System using ASP.NET Core Web API, Angular, and SQL Server; set up Azure DevOps CI/CD pipelines for automated build and deploy on Azure App Service.
- Designed RBAC policies to enforce role-based data access, adopted into the main product codebase post-internship.

KEY PROJECTS

DEVFORGE.AI — *Cloud Security Scanning Platform — Azure Kubernetes Service*

- Deployed containerized security scanning platform on AKS using Docker, Kubernetes Deployments, Services, HPA, and Ingress configurations.
- Provisioned Azure infrastructure using reusable Terraform modules and Azure Deployment Stacks.
- Integrated Prometheus and Grafana for real-time monitoring and visualization of Kubernetes cluster and container metrics.
- Built Azure DevOps CI/CD pipelines for automated Docker image builds and Kubernetes rollouts.
- Enabled Azure DNS Logs, NSG Flow Logs, and Azure Activity Logs for enhanced network visibility and threat monitoring.

TRUCKLOTS — *Cloud-Native Logistics Platform — Azure Container Apps + Terraform*

- Provisioned Azure infrastructure including VNets, Storage Accounts, Key Vaults, and Private Endpoints across multiple environments using Terraform.
- Implemented CI/CD pipelines integrated with Azure Monitor and Application Insights for secure and observable deployments.
- Troubleshoot VNet peering, NSG rules, UDRs, and DNS resolution issues between Container Apps and backend services.
- Configured automated monitoring alerts and runbook-based remediation for container restart and scaling events.

TWEETGARROT — *Enterprise Operations & Management Platform — Azure Serverless*

- Developed serverless analytics solutions using Azure Functions and Static Web Apps.
- Managed Terraform-based environment configurations for Dev, QA, UAT, Demo, and Production environments.
- Implemented Azure RBAC and Managed Identity for secure communication between Azure services.
- Configured Azure Application Gateway, VNets, NSGs, and Private Endpoints for secure traffic management and connectivity.
- Standardized infrastructure provisioning using reusable Terraform modules, reducing environment setup time by 60%.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Aug 2019 – Jun 2023

Kurukshetra University, Haryana • CGPA: 8.12 / 10
